one flexible region for allowing folding of the hood protector region to provide the vehicle shield device in a folded configuration that is shorter than the full length of the vehicle shield device as it would be provided when mounted to a vehicle hood so that the vehicle shield device can be packaged and shipped in the folded configuration. The hood protector region and the hood attachment region can be provided from a molded and continuous plastic sheet.

***Claim 12 has been replaced with:***

12. (CURRENTLY AMENDED) A method for packaging a vehicle shield device, the method comprising steps of:

hood attachment region constructed for attaching the hood protector region to a vehicle hood;

bending the hood protector region about the flexible region to provide the vehicle shield device in a folded configuration that is shorter than the full length of the vehicle shield device as it would be provided when mounted to a vehicle hood;

providing a shipping container; and

placing the vehicle shield device in the folded configuration into the shipping container.

***Claim 13 has been replaced with:***

13. (CURRENTLY AMENDED) A method according to claim 12, further comprising a step of using a fastener to hold the vehicle shield device in the folded configuration.
